

I drive a truck over the road for a living.I go to and through many cities and when i am coming up to a city i check the xm for road problems and weather.I tryed this with a local radio and you get nothing.The reports are much more informing,they tell me the roads i travel,and it is updated every few mins.I pay for this service.I am on the road 6 out of 7 days a week.It is a very important tool in me doing my work.
